

# Master of Information Systems Management

Building on more than 30 years of innovative graduate education and professional development programs in information technology, the McKelvey School of Engineering at Washington University in St. Louis now offers a 30-unit Master of Information Systems Management. This program combines the best of two very successful programs that have attracted students from across the world: the Master of Information Systems and the Master of Information Management. This integrated program is a key component of Washington University's strategy to prepare the next generation of technology leaders. The 30-unit Master of Information Systems Management brings together candidates with interests and backgrounds in technology and management into a blend of outstanding courses led by Washington University faculty and industry leaders in information, systems, technology, management, and leadership.

- **Full-time Master's Degree:** 30 units, 1-1.5 years to complete
