Online Master of Cybersecurity Management

This exclusively online, part-time program was developed for cybersecurity working professionals seeking to advance their leadership skills and to deepen the managerial acumen required to establish, maintain, and develop an effective and efficient cybersecurity enterprise. Students in this 30-unit program will acquire the expertise needed to successfully execute a range of core cybersecurity functions, including leadership, governance, risk management, operations, and incident response. The program places particular emphasis on business-related skills such as communicating with non-technical line-of-business leaders and peers, speaking the language of business, and strategy formulation and development. Graduates of this program will be well prepared to step into positions of greater responsibility and to make larger and more consequential contributions to their organizations.
